Regarding: Inspection of Report for Permit #S/001/0018

Attn: Paul Baker, Brett Gregory, Tom Munson

Gentlemen, after reviewing the letter that was sent on July 7, 2010 to Courgraph Rock, I feel that there should be a better explanation on the increased amount of the bond. I would like the opportunity to amend the NOI from 5 acres to 2.89 acres. What I have read in the inspector's report, performed by Brett Gregory for Tom Munson, the area of disturbance is only 2.89 acres. The current 5,000 was set in place for the 5 acres; you show three times that amount for the 2.89 acres. I am an earth mover by profession and have the equipment to do the reclamation work. However, understand the State's position on this. I would like the opportunity to submit a reclamation plan and include the cost of the earth moving from an independent contractor along with my costs for the same work. As far as the re-vegetation of the area, I work with a state approved source for the seeds and have reclaimed other areas. If there is some misunderstanding regarding this, please let me know about it. I hope that you will consider this concern. If so please advise what you will need in the plan.

Thank you,

Sincerely,

Howard Todd Truman
